PREFACE

“Let 'q' be an arbitrary sentence of the language and suppose that the theory is inconsistent. This means that we can derive the sentence 'p and not-p'. From this 'p' follows. And from 'p' it follows that 'p or q' (if 'p' is true then 'p or q' will be true no matter whether 'q' is true or not). Equally, it follows from 'p and not-p' that 'not-p'. But 'not-p' together with 'p or q' entails 'q'.”

W.H. Newton-Smith, *THE RATIONALITY OF SCIENCE*, 1981, p. 229 states

“...if a theory is inconsistent it will contain every sentence of the language ...

Thus once we admit an inconsistency into our theory we have to admit everything ...

a theory which contained each sentence of the theory's language and its negation...”

proof

“Let 'q' be an arbitrary sentence of the language and suppose that the theory is inconsistent. This means that we can derive the sentence 'p and not-p'. From this 'p' follows. And from 'p' it follows that 'p or q' (if 'p' is true then 'p or q' will be true no matter whether 'q' is true or not). Equally, it follows from 'p and not-p' that 'not-p'. But 'not-p' together with 'p or q' entails 'q'.”

Mathematics is inconsistent and since science is built upon mathematics science is inconsistent thus all sentences in mathematics and science are valid this means it is possible to prove anything and everything it is possible to prove Fermat's Last Theorem and it is possible to prove the negation of Fermat's Last Theorem It means it is possible to prove *Einstein's* theory of relativity and it is possible to prove the negation of *Einstein's* theory of relativity and there is a negation the *Brans–Dicke* theory

https://en.wikipedia.org/wiki/Brans%E2%80%93Dicke_theory

"At present, both *Brans–Dicke* theory and general relativity are generally held to be in agreement with

observation. **Brans–Dicke theory** represents a minority viewpoint in physics.”

“It [**Brans–Dicke theory**] is an example of a **scalar–tensor theory**, a gravitational theory in which the gravitational interaction is mediated by a **scalar field** as well as the **tensor field** of general relativity. The **gravitational constant** G is not presumed to be constant but instead $1/G$ is replaced by a scalar field which can vary from place to place and with time.”

Thus

The system of mathematics contains everything it contains each sentence of the theory's language and its negation

The system of science contains everything it contains each sentence of the theory's language and its negation

All possible realities/theories and their negation are now possible and equally valid reality is thus meaningless it is a

Coincidentia oppositorum it is what ever the theoretical system says it is and what it says it is its negation is equally valid- all theoretical systems are valid and so is the negation of these theoretical systems valid

***Proof mathematics is
inconsistent***

***A finite number is not a
non-finite number***

And its negation

***A finite number = a non-
finite number***

***It be proven that
 $1 = 0.999\dots$***

Let be $x = 0.999..$

$$10x = 9.999...$$

$$10x - x = 9.999... - 0.999...$$

$$9x = 9$$

$$x = 1$$

But that proof thus shows a finite number be equal to a non-finite number thus a contradiction in terms thus mathematics ends in contradiction

Again

$$1+1=2$$

And its negation

$$1+1=1$$

It be said that $1+1=2$ be a certain truth

Blah

1 number + 1 number = 1 number

1 number (2) + 1 number (2) = 1 number (4)

So $1 + 1 = 2$

And

$1 + 1 = 1$

Thus a contradiction in mathematics

**Here we have two
contradictions in
mathematics**

A contradiction in reality

A glass half full

And its negation

A glass half empty

***Deans glass show that
the glass is half full and
half empty at the same
time thus showing the law
of non-contradiction is
wrong***

W.H. Newton-Smith, THE RATIONALITY OF SCIENCE, 1981, p. 229: "A theory ought to be internally consistent. The grounds for including this factor are a priori. For given a realist construal of theories, our concern is with verisimilitude, and **if a theory is inconsistent it will contain every sentence of the**

language, as the following simple argument shows. Let 'q' be an arbitrary sentence of the language and suppose that the theory is inconsistent. This means that we can derive the sentence 'p and not-p'. From this 'p' follows. And from 'p' it follows that 'p or q' (if 'p' is true then 'p or q' will be true no matter whether 'q' is true or not). Equally, it follows from 'p and not-p' that 'not-p'. But 'not-p' together with 'p or q' entails 'q'. **Thus once we admit an inconsistency into our theory we have to admit everything.** And no theory of verisimilitude would be acceptable that did not give the lowest degree of verisimilitude to **a theory which contained each sentence of the theory's language and its negation.**"

All observation is theory laden Thus if you change the theory the meaning of the observation changes

Now with the inconsistency of mathematics and science all possible realities/theories and their negation are now possible and equally valid Thus we have now that all theories are now valid and the meanings these theories give to the observation are all valid

In the every day world this means that all views are valid but so are the opposing views valid Thus all civil rights views are valid ie pro gay marriage is valid but so is the opposing view ie anti-gay marriage is valid

So with each opponents view being valid so there is no need/point to argue anymore

as

Each view contains within it its negation as all views end in meaninglessness
