the age of the enlightenment is at an end :reason is bankrupt

<https://www.wsj.com/articles/the-dark-side-of-the-enlightenment-1523050206>

“This astonishing arrogance of the enlightenment is based on a powerful idea: that mathematics can produce universal truths by beginning with self-evident premises—or, as Rene Descartes had put it, “clear and distinct ideas”—and then proceeding by means of infallible deductions to what Kant called “apodictic certainty.””(Yoram Hazony)

it is proven this arrogance is destroyed as

mathematics /science end in contradiction

it is proven $1+ 1=1$

an integer = a non-integer

thus maths ends in contradiction

and the notion that maths gives us apodictic certainty is destroyed

"all products of human thought end in meaninglessness" mathematics science philosophy ie nihilism post- modernism etc; "

All products of human thought end in meaninglessness:science mathematics philosophy etc

It is proven

an integer = a non-integer

When everything is meaningless then logically everything is epistemological equal: so just choose anything--religion science etc it does not matter

take mathematics-with it ending in meaninglessness/contradiction

you can prove or disprove anything in mathematics

you can prove Fermat's last theorem and also disprove Fermat's last theorem

An example of how enlightenment thinkers avoid the fact that reason is bankrupt

The avoidance of contradiction by
SCIENTISTS: Mathematicians DoubleThink

<https://en.wikipedia.org/wiki/Doublethink>

note the word indoctrination ie their mathematics education brainwashing

“Doublethink is a process of indoctrination whereby the subject is expected to simultaneously accept two mutually contradictory beliefs as correct, often in contravention to one's own memories or sense of reality.”

EXAMPLE

you know 0.9999... (the 9s dont stop) is a infinite decimal thus non-integer by notation

you know 1 is an integer

yet you also believe

you say

$1 = 0.9999\dots$

without contradiction

because now you say

0.999... is now an integer

here is the doublethink

1 integer = 0.9999... non-integer infinite decimal

ie

an integer is \neq a non-integer

which is a contradiction in terms -which your doublethink does not see

thus

maths ends in contradiction

https://web.archive.org/awa/20210624003327mp_/http://gamahuchepress.yellowgum.com/wp-content/uploads/A-Theory-of-Everything.pdf

or

<https://www.scribd.com/document/455372682/A-Theory-of-Everything>

now the very interesting fact

With mathematics ending in contradiction you can prove anything in mathematics

You can prove Fermat's last theorem

and

you can disprove Fermat's last theorem
